

## Announcement of International Conference on Pharmaceutical Research and Drug Discovery

Drug delivery describes the method and approach to delivering drugs or pharmaceuticals and other xenobiotics to their site of action within an organism, with the goal of achieving a therapeutic outcome. Issues of pharmacodynamics and pharmacokinetics are important considerations for drug delivery. Drug Delivery and Translational Research publishes research focused on such topics as designing and developing novel drug delivery systems, with a focus on their application to disease conditions, preclinical and clinical data related to drug delivery systems, short-term and long-term biocompatibility of drug delivery systems, host response, biomaterials with growth factors for stem-cell differentiation in regenerative medicine and tissue engineering, image-guided drug therapy nanomedicine devices for drug delivery and drug/device combination products

Conference series organises leading international conferences and webinars and is instrumental in bringing together experts and beginners for cooperative and effective research-oriented discussions. The goal of Conference series conferences is to bring together scientists at every level from different disciplines to understand and discuss during programmed topic sessions and informal gatherings. Conference series conferences will showcase innovative, cutting-edge research on the fundamental roles in addressing the challenges and translational research from academia to industry. All these opportunities will support professional growth of younger scientists that will promote future collaborations and enhance participation and contribution to their exciting research work. Exciting oral sessions and poster sessions will reflect broad diversity of research and will include topics driving innovative efforts and provides maximal opportunity for scientific exchange respectively. Besides invited speakers, many speaker slots are chosen from submitted abstracts to ensure good representation of those who are new to the field, young investigators, and recent results. Contact us and we'll connect you with the right subject expert from our vast network of experienced operation professionals worldwide.

Conference series conferences also, encourage bright minds with special awards and certifications which are categorized to best speaker talks, best abstract, best poster award, outstanding young researcher award and the house of delegate awards. Fetal and Maternal Medicine scientific committee is responsible for recommending individuals for awards for consideration and approval. Winners of the awards will be considered to have presented an original scientific or technical study investigating a novel application or an innovative research approach, of a standard suitable for publication at an international level.

We encourage you to have a look on our official website and submit your speech abstract as the earliest, so that we can reserve your slot.
