## QUICK FIX BY SOCIAL 6

### Abhiyanth Shetty

Rajiv Gandhi University of Health Science, India

**S**ocial 6 Braces or Six Month Smiles are specially designed to straighten your front upper and/or lower anterior six teeth with short term orthodontic treatment within six months for aesthetic purposes only. These six month braces are a quick fix for those worried about what their smiles look like, however, bite, arches, root angles, and jaw alignment are not addressed. Millions of adults are unhappy, self-conscious or even embarrassed of their smile and they're just looking to improve the appearance of their smile. Some patients notice their teeth becoming increasingly crowded with age; others may have just one tooth that's always bothered them; some have even had orthodontic treatment before, only for their teeth to move after they stopped wearing their retainers. Social 6 braces can be the perfect solution to

these scenarios. Conventional orthodontic treatment can take around 18 months, whereas social 6 braces can straighten teeth in a fraction of the time. This speediness doesn't mean they cut corners; they're faster because they're only focused on aligning your front teeth. Thanks to a growing demand for social 6 braces, there are now several different types to choose from. These include discreet options such as clear aligners and fixed braces with clear or tooth-coloured brackets or even lingual braces. It's ideal for straightening teeth that are mildly crowded/crooked, spacing or mild open bite too. Now, there is an effective, safe and affordable cosmetic braces solution that fits every bodies lifestyle.
