The hidden connection between the unconscious mind & mental health & hypnotic rhythm

This talk aims to bring accurate thinking and a creative mind set on possible innovative psychiatry & psychosomatic medicine. It will disclose. The ecosystem uses hypnotic rhythm to trap humans into the whirlpool of on-going psychological barriers or "irreversible" mental disorder for the eventual tragic ending. How a variety of mental health symptoms are shaped into different energy forms. How to break the thought pattern before it becomes the symptoms. The cause of most professionals being trapped in the confusion of the subconscious mind and unconscious mind. How most of us are misled to the endless darkness of the subconscious mind. How our super mental strength against us. The resources of symptoms from the unknown. How nutrition, diet, paranormal phenomena, healing, meditation, etc. trigger possible mental health issues, etc. The case study will bring ideas on how we could deal with the unknown part of the mind effectively.

## Biography

Angela Wilson PhD Holistic Researcher and Case Investigator from Achievers Resource, Brisbane Australia Mind Power Lady, and also known as the authority of the unconscious mind. The combination of taking as an extra person in the family and living in a world of medical professionals led her hands truly on what humanity is looking for but afraid most of us to find out at the early age of six. Her cutting-edge discovery brings possible innovative research on medical treatment. It results from eleven generations of Chinese herbal medicine Heritage; the 22<sup>nd</sup> generation on energy healing; academic study; holistic qualifications; rich clinical experience; and unstoppable cross-disciplinary testing by risking her life d and more.
